

JERRY THE BEAR QUICKSTART GUIDE

JERRY AND HIS ACCESSORIES

× 10 Food Cards

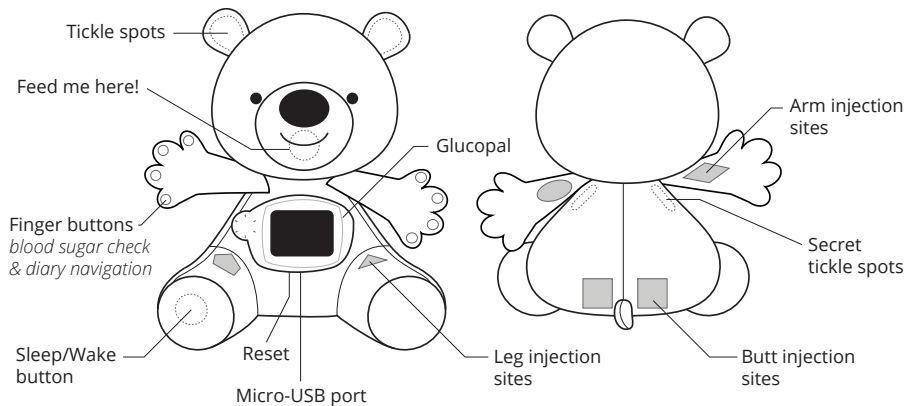

Insulin Pen

Backpack

JERRY'S SENSOR LAYOUT

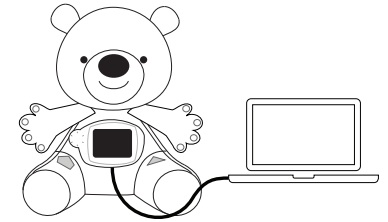

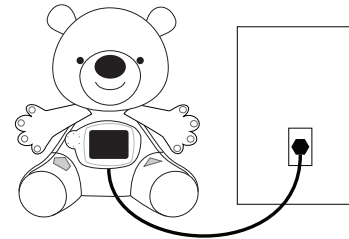

CHARGING JERRY

Jerry's charging port is located at the bottom of his Glucopal. Charge Jerry with the included micro-USB cable and a computer or a power adapter with a USB outlet, such as a smartphone charger.

Be careful to insert the included cable in the correct orientation.

A full charge takes approximately 5 hours, yielding 4 hours of playtime or 1 week in sleep mode.

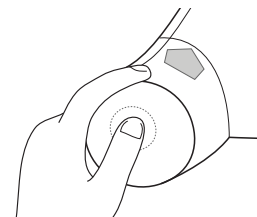

Tip: Turn Jerry off to help him charge faster!

Caution: Only use power adapters that are UL-certified. Look for the "UL listed" logo on the power adapter. Uncertified chargers may be unsafe and may damage Jerry.

TURNING JERRY ON & OFF

ON

To turn Jerry on, press and hold the button in his right foot for 3 seconds.

OFF

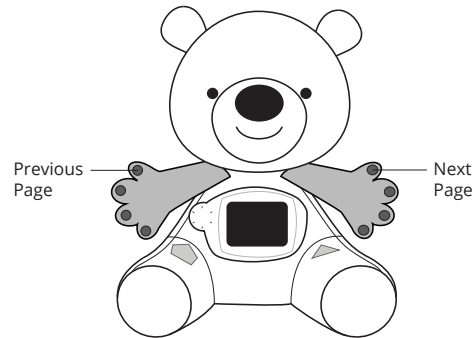

To turn Jerry off, press and hold the button until you see a pop-up menu.

JERRY THE BEAR HOW TO PLAY

GAMEPLAY

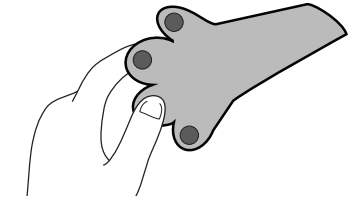

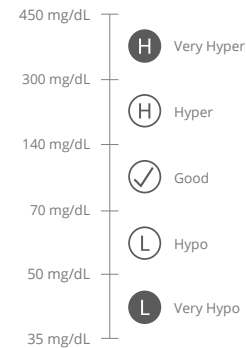

Jerry was chosen to represent his school in the All Star Games, but he has a lot to learn before he's ready! Follow Jerry and his guide, Navi the Bus, on this adventure through a series of diaries that Jerry has stored on his Glucopal.

After each diary entry, new tasks are assigned with fun activities and lessons to care Jerry. Complete these tasks to advance through Jerry's diaries!

Navigating Jerry's Diaries

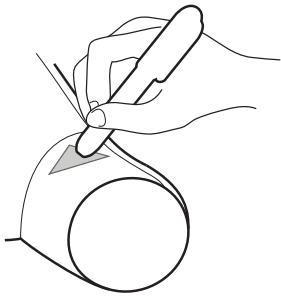

CHECKING JERRY'S BLOOD SUGAR LEVEL

Squeeze one of Jerry's fingers to check his blood sugar level. Jerry's blood sugar level will be displayed on his Glucopal and he will tell you how he is feeling.

Jerry has 4 symptomatic states: very hypo, hypo, hyper, and very hyper.

DOSING INSULIN

Hold Jerry's insulin pen to one of his injection sites to bring up the dosing screen on Jerry's Glucopal. Use the arrows to dial a dosage.

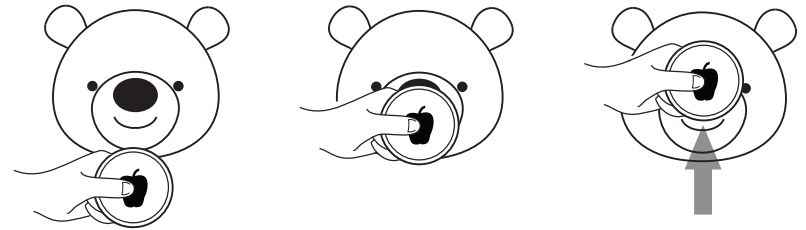

COUNTING CARBS

$$5 \text{ carbs} = \text{● food}$$

$$\text{● food} = \text{● insulin}$$

In Jerry's world, every 5 carbs represents one dot of food. For every dot of food that Jerry eats he will need one dot of insulin.

FEEDING JERRY

Build a plate of food for Jerry by slowly swiping his food cards from the bottom of his mouth to the tip of his nose. Make sure the center of the food card touches his mouth.

Once a plate is complete, select whether the plate is a meal or a snack to feed Jerry.
